**VALUE-BASED HEALTH CARE IN MANITOBA:
REDESIGNING THE SUPPLY CHAIN FOR SUCCESS**

NOVEMBER 21, 2017

CANADA'S MEDICAL TECHNOLOGY COMPANIES
LES SOCIÉTÉS CANADIENNES DE TECHNOLOGIES MÉDICALES

TIME	TOPIC	SPEAKER
8:45 A.M.	Welcome	Tracey Maconachie – President, Life Science Association of Manitoba
9:00 A.M.	Enhancing Value Through Better System Alignment in Manitoba Dr. Brock Wright, President and CEO, Shared Health Services Manitoba, will provide a brief overview of the new Provincial Health Organization, its clinical governance model, and how a shift to value based thinking can enhance sustainability and improve care for patients.	Dr. Brock Wright – President & CEO, Shared Health Services Manitoba
9:45 A.M.	Value-Based Health Care: What Is It? Continuum, Value, Outcomes, Measurement Value based healthcare delivery is a concept, an aspiration and an important step to ensure optimized patient care and system sustainability in Canada, but do we all know what we mean? Is there a common understanding? During this session, we will explore some of the common terminology, concepts and elements of value based healthcare. We will discuss the continuum of potential methodologies, the complexities of measuring total costs and outcomes, the principles of value for money and explore some global projects.	Pamela Robertson – Managing Director, ACG Inc. and MEDEC Lead, Strategic Procurement
10:15 A.M.	Break	
10:45 A.M.	Operationalizing The Value For Money Framework In Alberta Alberta has developed and introduced a novel approach whereby innovative technologies can be adopted by the healthcare system based on the 'value' they provide, which is based on measurable, efficient, effective, scalable and sustainable improvements at the clinical level. Taking a needs based approach, and within a value for money framework, the implementation of this approach highlighted system level challenges and barriers that needed to be addressed in real time to edge towards success. These challenges and barriers will be presented and discussed, offering the opportunity to consider this approach in Manitoba.	Dr. Hameed Khan – Lead, Health & Health Care Initiatives, Alberta Innovates Health Solutions

11:15 A.M.	<p align="center">Beyond Change Management: Changing Culture - Changing Outcomes</p> <p>Jim Slater, CEO, Diagnostic Services Manitoba, and Shared Health executive lead for Provincial Health Supply Chain will discuss the critical role change management will play in addressing historical supply chain processes; and to recognize the role that people and culture play in achieving the desired outcomes as we shift to value-based healthcare in Manitoba.</p>	<p align="right">Jim Slater – CEO, Diagnostic Services Manitoba</p>
